

SAKSHI GUPTA

Gurugram, Haryana

Software Developer | MERN Stack Developer | React.js | Node.js | Java

 +91-6396235369  Email  Portfolio  LinkedIn  GitHub  GFG  LeetCode

SUMMARY

Full-Stack Developer focused on engineering scalable end-to-end applications. Skilled at utilizing AI-driven tools to optimize workflows, streamline code quality, and transition client requirements into stable production deployments and doing testing.

EDUCATION

Hindustan College of Science and Technology

2020 – 2024

Bachelor of Technology in Computer Science and Engineering

EXPERIENCE

Rosmerta Technology | Software Developer

Aug 2024 – Present

- Spearheaded the System Design and development of scalable backend services using Java, Spring Boot, and Hibernate; engineered high-performance REST APIs with robust validation and optimized SQL schemas.
- Automated deployment workflows by designing and implementing CI/CD pipelines using Jenkins, reducing manual deployment time by 45% and minimizing production release errors.
- Architected a full-stack E-commerce course platform using React.js, Next.js, TypeScript, Node.js, Express, and MongoDB.
- Automated Razorpay invoicing via Redis/cron, cutting manual tasks by 90% and boosting workflow speed by 40%.
- Strengthened system security by integrating JWT and RBAC with rate limiting, cutting auth overhead and API costs by 30%.
- Constructed a secure KYC module using AWS S3 pre-signed URLs, cutting server load by 100% and upload latency by 35%.
- Streamlined system performance by 40% using Redis caching and reduced redundant API calls by 50%.
- Integrated features including role management, promo codes, multilingual support, and course purchase flows.
- Enhanced UI responsiveness by 30% through database indexing and query optimization.
- Contributed to live enterprise products: Pravesh (VMS) and Surakshit Sewa.

Mobiloite Technology | MERN Stack Trainee

Feb 2024 – Aug 2024

- Built responsive UI components using React.js and Material-UI for cross-device compatibility.
- Constructed admin dashboards and integrated REST APIs with efficient CRUD operations.
- Delivered features for E-commerce, Hospital Management, and HealthTech applications.
- Collaborated on debugging, feature enhancements, and deployment of production applications.

Agra Smart City | Full Stack Trainee

Jul 2023 – Sep 2023

- Built a ROAD Portal system using HTML, CSS, JavaScript, HBS, Node.js, Express.js, and MongoDB.
- Standardized auth and recovery protocols, boosting admin oversight of road updates by 30% via a central dashboard.
- Deployed all CRUD operations and notification functionality.

PROJECTS

E-commerce Website | React, Node.js, Express.js, MongoDB

- Built a full-stack E-commerce platform using the MERN stack with modular architecture.
- Implemented authentication, authorization, and cart workflows, improving efficiency by 30%.
- Integrated image uploads using Multer and Cloudinary for scalable media handling.
- Boosted performance by 40% using Redis caching, lazy loading, and rate limiting.

Chatting Application | Java, Swing, AWT, Sockets

- Developed a real-time desktop chat application using Java Swing, AWT, and Socket Programming.
- Enabled client-server communication for sending and receiving messages in real time.
- Applied client-server architecture concepts to handle concurrent communication.

Real-time Chat Application | MERN, WebSockets, Redis

- Built a real-time chat app using **MERN + WebSockets**, enabling messaging with <200ms latency.
- Implemented JWT authentication, securing 100% of socket communications.
- Optimized delivery using Redis caching, reducing message loss to 30% and improving performance by 35%.
- Refined chat functionality with offline sync and infinite scroll, improving data throughput by 25%.

Banking Management System | Java, Spring Boot, SQL, STS

- Built a Java Spring Boot & Hibernate-based banking system with JPA for CRUD operations.

TECHNICAL SKILLS

Languages: Java (800+ DSA problems solved), OOP, Multithreading, JavaScript (ES6+), TypeScript.

Frameworks: Spring Boot, React.js, Next.js, Express.js, Redux, Material UI, Tailwind CSS, HTML

Backend/DB: Node.js, Redis, REST APIs, MongoDB, MySQL, PostgreSQL, Hibernate, JPA

Cloud/Tools: AWS S3, Docker, Git, GitHub, Jenkins, Postman, Vercel, Cursor, ChatGPT, Claude, Gemini

CERTIFICATIONS

• Innovate India Championship Round 1 & 2 | • DSA in Java | • Big Data Tech | • Flipkart Grid Participant
